

**PRESENTS:**  
***BASIC DIGITAL IMAGING***

The **Plano Police Department** is proud to announce that it is hosting a **basic, three-day**, hands-on training program in forensic digital imaging **September 22 – 24, 2020**. This class will be held at the City of Plano, Technologies Services Building in Plano, TX.<sup>1</sup>

During this **introductory three-day** course, participants will develop a fundamental understanding of digital imaging concepts and technologies, and will be able to perform and explain basic Adobe® Photoshop® processing and functionalities. In addition, participants will acquire expertise and knowledge of digital imaging processes and will learn how to apply these techniques to aid in the **forensic investigative process**.

Throughout this **hands-on** training program, participants will follow best practices that focus on **basic digital imaging** processes for calibrating and enhancing digital photographs, preparing composites, creating court exhibits and more. The participants will be required to complete a number of practical exercises to demonstrate their knowledge and their ability to apply the basic tools and techniques that have been taught. For example, participants will scale (calibrate) digital images for accurate, life-size output as well as choose the appropriate procedures for enhancing various types of evidentiary images to optimize image quality and contrast.

Participants are encouraged to bring some of their own images (in TIF or camera RAW format) so they utilize their newly learned concepts, tips and techniques in practical exercises using their own images! They will document, interpret and explain their image analysis process as well as describe the best practices for basic digital imaging concepts.

With more than 25 years of AFIS and forensic digital imaging experience, David Witzke (AKA Ski), is considered to be one of the foremost experts in forensic digital imaging technologies. Ski is an associate member of the International Association for Identification (IAI), the European and several regional divisions of the IAI; the Canadian Identification Society (CIS); and the European Network of Forensic Science Institutes Fingerprint Working Group (ENFSI FWG), where he has also been elected to serve on the ENFSI FWG Steering Committee; and Ski is the chairperson for the Digital Evidence Subcommittee for the IAI.

Ski is a contributing writer for three well-known forensic books: *Crime Scene Photography* (Third Edition, published 2016 by Academic Press), *Introduction to Crime Scene Photography* (Published 2012 by Academic Press) and *Footwear, The Missed Evidence* (Third Edition, published 2013 by Staggs Publishing). (*Crime Scene Photography* has been chosen by the IAI certification committees for the Certified Crime Scene Investigator (CCSI) Certification Test, the Certified Crime Scene Analyst (CCSA) Certification Test, the Certified Senior Crime Scene Analyst (CSCSA) Certification Test, and the Forensic Photography Certification Test.)

---

<sup>1</sup> Participants must attend all three days of training. It is also recommended that each person attending this program have at least a basic understanding of the Microsoft Windows 7 or 10 operating system. In addition, participants should, at a minimum, have a basic familiarity with Adobe Photoshop.
