PRESENTS:

ADVANCED DIGITAL IMAGING

The South Carolina Law Enforcement Division is proud to announce that it is hosting an **advanced three-day**, hands-on training program in forensic digital imaging **October 16 – 18, 2018**. This class will be held at the South Carolina Law Enforcement Division Annex in **Columbia, SC**.¹

This **advanced three-day** course will help participants develop a comprehensive understanding of Adobe® Photoshop®. In addition, participants will obtain a thorough understanding of digital imaging concepts and how these concepts aid in the **forensic investigative process**. Participants are encouraged to bring some of their own images (in TIF or camera RAW format) so they apply these newly learned concepts in practical exercises using their own images! They will also learn how to document their image analysis process as well as explain their digital imaging processing in court.

This hands-on training program will focus on **advanced** imaging concepts and techniques for enhancing digital photographs, preparing proof sheets, creating court exhibits and more. It will also provide an advanced understanding of digital imaging technologies as well as deliver an indispensable understanding of and hands-on experience with the most commonly used image enhancement tools. For example, you will learn how to scale digital images for accurate, life-size output as well as learn the recommended procedures for enhancing various types of images for maximum image quality and contrast. You will also learn how and when to apply different techniques to remove background noise as well as how to enhance contrast to bring out ridge detail that is barely visible to the human eye.

With more than 20 years of AFIS and digital imaging experience, David Witzke (better known as Ski), Vice President of Program Management for Foray Technologies, is considered to be one of the foremost experts in forensic digital imaging technologies. During the past 20 years, Ski has conducted literally hundreds of beginner, intermediate and advanced digital imaging training programs for law enforcement agencies at all levels – local, State and Federal – throughout the United States and Canada. He has earned both national and international recognition for conducting user training for novice and experienced computer users in a wide range of forensic disciplines.

Ski is a contributing writer for three well-known books within the forensic science community: *Crime Scene Photography* (Second Edition, Published 2010 by Academic Press), *Introduction to Crime Scene Photography* (Published 2012 by Academic Press) and *Footwear, The Missed Evidence* (Third Edition, Published 2013 by Staggs Publishing).

¹ Participants must attend all three days of training. It is also recommended that each person attending this program have at least a basic understanding of the Microsoft Windows NT, 2000, ME, or XP operating system.
