

# Digital Impressions

## Featured Product:

### ADAMS™ Web Advanced for Property and Evidence Management

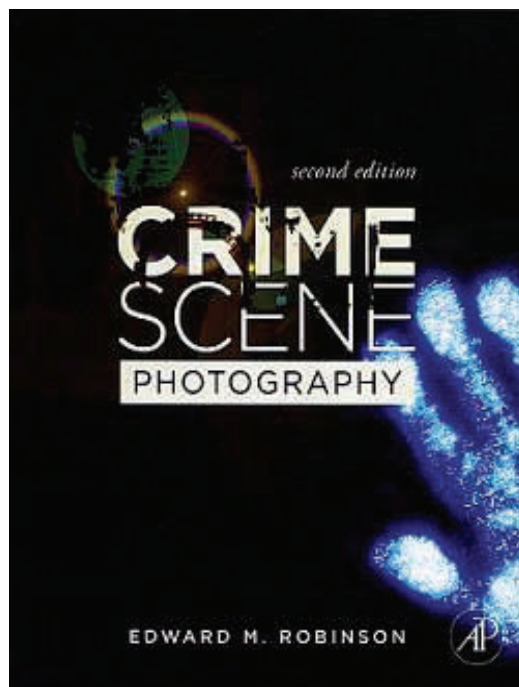

The ADAMS Web Advanced application for Property and Evidence Management is a browser-based, fully automated, turnkey solution that lets you efficiently check items in to and out of your property rooms as well as locate and retrieve those items, reconcile the contents of your property rooms and limit your physical evidence storage requirements through accurate records management and disposal of your physical evidence. In addition, this solution is integrated completely with the ADAMS digital evidence system, which allows you to acquire, view, print and track your digital evidence using a single, sophisticated solution that is designed for maximum flexibility and ease of use. Our integrated solution provides a benefit unmatched by any other solution available today: You only have to introduce, maintain and support a single platform instead of managing, maintaining and supporting multiple platforms and multiple software solutions.

The feature-rich, fully customizable ADAMS Property and Evidence Management System also provides a variety of barcode labeling and scanning capabilities that enable you to simplify the storage, management and tracking of your physical property and evidence. It includes a robust, audit trail feature – just like the Foray ADAMS digital evidence system – to maintain the chain-of-custody for your physical evidence from the time it is collected at the scene of the crime until it is presented in court.

## Book Highlight:

**Crime Scene Photography, Second Edition** by Edward M. Robinson (with chapter contributions by David “Ski” Witzke) is scheduled for release early this year. This is an essential reference book for all aspects of crime scene photography that covers topics such as photography techniques, the Inverse Square Law, court cases affecting digital photography, photogrammetry and digital technologies. The **Second Edition** is printed in color with more than 600 full-color photographs. Also, there are new chapters on the history of forensic photography and digital image processing of evidentiary photography. (*Crime Scene Photography* is required reading by the Crime Scene Certification Board of the International Association for Identification.) This new edition can be ordered from Amazon.com or downloaded on e-book reader.

### Evidence Management System

Foray Technologies has developed a revolutionary system to store, maintain, search and analyze your physical and digital evidence gathered at crime scenes. The system provides complete control over the chain of custody of each and every piece of evidence.

# 2010 EDUCATIONAL CONFERENCES

## February

- 10<sup>th</sup>-12<sup>th</sup> – ASCR, San Diego CA\*
- 17<sup>th</sup>-18<sup>th</sup> – Property and Evidence Assoc. of Florida, Orlando FL\*
- 22<sup>nd</sup>-27<sup>th</sup> – AAFS, Seattle WA

## March

- 1<sup>st</sup>-3<sup>rd</sup> – CA Police Chiefs Association, San Jose CA
- 2<sup>nd</sup>-5<sup>th</sup> – California Homicide Investigators Association, Las Vegas NV
- 14<sup>th</sup>-16<sup>th</sup> – Cop Tech Summit, Washington D.C.
- 20<sup>th</sup>-26<sup>th</sup> – CBDIAI, Virginia Beach VA\*
- 23<sup>rd</sup>-24<sup>th</sup> – GovSec, Washington D.C.
- 23<sup>rd</sup>-24<sup>th</sup> – Kansas DIAI, Kansas State University
- 24<sup>th</sup>-26<sup>th</sup> – Wisconsin DIAI, Stevens Point WI
- 29<sup>th</sup>-Apr. 2<sup>nd</sup> – Texas Police Chiefs Association, Addison TX

## U.S. Army Corps of Engineers Veterans Curation Project (VCP) :

**Foray Technologies Teams Up with Forensic Digital Imaging, Inc. to provide wounded Veterans with work skills and experience in the preservation of archaeological artifacts**

In October 2009, the U.S. Army Corps of Engineers, Center of Expertise (CX) for Curation and Management of Archeological Collections (CMAC), St. Louis District, began a groundbreaking new project, the **Veterans Curation Project (VCP)**. This project employs and trains Iraq and Afghanistan returnees along with Vietnam era veterans in archaeological curation processing under the management of the Corps of Engineers, Brockington and Associates, Inc., and Forensic Digital Imaging, Inc. In total, three laboratories have opened in Augusta, GA., St. Louis, MO., and Washington, D.C.

### The Forensic Connection:

In August of 2009 Forensic Digital Imaging, Inc. (FDI) was awarded a contract for the VCP program to develop and implement a complete digital imaging system designed for the visual documentation of artifacts and documents associated with archaeological collections owned by the U.S. Army Corps of Engineers. As president of (FDI) David Knoerlein “digitaldave” a retired forensic analyst, recognized the similarities between forensic evidence processing and management and the archaeological curation process. Working with collections experts and with the mission goals of the program in mind, David created a comprehensive system of equipment, software, procedures, and training to meet their special needs. All of the system components (cameras, lighting, copy stand, camera stand, etc.) were specifically chosen and configured with an understanding that many of the veterans may have disabilities that would limit their ability to manually operate certain equipment. Knoerlein installed identical equipment in all three locations and developed a training program to ensure that each veteran was capturing museum quality images in the exact same manner using the same lighting as all of the other veterans.

It was decided early on that a forensic imaging management system would be utilized to acquire, store, and manage all of the digital assets. After numerous meetings with

Foray Technologies personnel and experts in the archaeological curation field a solution was designed for the VCP by Foray Technologies using Foray’s Authenticated Digital Asset Management System (ADAMS)™ software platform to meet the specific needs of the VCP program.

Foray Technologies sales, tech support, and developmental staff have been and continue to play a major role in making this very important program a success. The knowledge and experience that the veterans are receiving from this program will hopefully help them to find satisfying full-time employment in the future. They deserve the best we can offer.

Article contributed by David Knoerlein, President of Forensic Digital Imaging, Inc.

### USER GROUP MEETING UPDATE:

**SAVE THE DATE – 2010 FORAY USER GROUP MEETING HAS BEEN SCHEDULED!!!!!!!!!!**

The Foray ADAMS™ User Group Meeting has been scheduled and we would love to see you in sunny San Diego, so save the date and contact your Sales Representative for additional information (fees, travel, etc) and to register!

Dates: August 23<sup>rd</sup> – 25<sup>th</sup> (Welcome Reception held Sunday evening August 22<sup>nd</sup>)

Location: San Diego, CA (Hello Sunshine!!)

This is a great opportunity to meet and interact with other Foray ADAMS™ users and to play a key role in future development of Foray Technologies applications for the law enforcement community. Topics will include:

- Demonstrations of newly released and upcoming Foray Evidence Management applications
- Technical Support Updates and Q&A
- User Presentations
- Best Practices for Digital Evidentiary Photography and Digital Image Processing
- User Group Discussions – System Validation, SOP Preparation and Development
- And much more!!!!

**For additional information please contact Foray Technologies at (619) 858-1360**

## Acquiring Solutions

Foray Technologies provides consulting focused on your operations to identify your evidence management needs. We deliver classroom training to educate you and your staff on the processing of evidence. We supply the software needed to acquire, store, view, analyze, present and archive your digital and physical evidence while maintaining a strict chain of custody. And we offer a full line of systems, including servers, large storage sub-systems, and specialized analysis workstations you need to process evidence. Finally, our project management ensures that each phase of your system implementation is a complete success.

## **Advancing Technology**

In a world where law enforcement agencies are experiencing unprecedented cooperation with each other, **Foray Technologies** is ready to assist you. Our solutions help you organize your physical and digital evidence for easy access, rapid analysis and effective presentation while maintaining a rock-solid, defensible chain of custody.

Let us join your team and share the experiences we've gained from having the world's largest law enforcement agencies as our customers.
